Auto-Tracking Systems

Saber Auto-Tracking Systems

In education and training environments, camera auto tracking is widely used and highly beneficial for an up-close shot of a presenter who will be moving around. These are usually IR-based systems where the tracking camera will follow an IR lanyard on the presenter, however; Angekis' Saber Auto-Tracking is unique and utilises facial, motion and shape tracking to accurately follow a presenter around.

Both Saber AT systems include an Intel NUC pre-configured with the tracking software, a Saber Plus camera and the necessary cables needed for installation.

Saber-AT £1,249.00	1080P/60 PTZ camera,IP, HDMI, 3G-SDI & USB3.0, 20x optical, Auto Tracking.
Saber-AT-NDI-HX £1,349.00	1080P/60 PTZ camera,IP, HDMI, 3G-SDI, NDI HX & USB3.0, 20x optical, Auto Tracking.

Multi-Connectivity Cameras

USB, HDMI, SDI and IP cameras.

As well as USB, Angekis offer multi-connectivity PTZ cameras for other forms of video capture, such as: recording and streaming. For these applications, users will be needing a HDMI, SDI or IP output and in some cases, they'll need to work simultaneously.

Angekis' range of Saber cameras offer simultaneous USB, HDMI, SDI and IP outputs for multi-functioning rooms looking to video conferencing, live stream and display.

The Saber ranges feature greater zooming capabilities for use in larger spaces, plus Power over Ethernet to remove the need for power supplies.
