

## INTEGRATOR PRICE LIST – NOVEMBER 2021

### Mira Connect Systems

#### Mira Connect 10

Aveo Systems' Mira Connect smart AV control system is a touchscreen control device for controlling the equipment in your installations. Mira Connect is easily configured and managed through Mira Portal, Aveo's secure cloud-based management platform. No custom programming is required.

Mira Connect 10's user interface is professionally designed and automatically generated based on the equipment added to the room.

Mira Connect 10 is designed for the majority of collaboration installations where a traditional control systems cost and complexity are not required, and where a manufacturers specific user interface's focus is too narrow and limiting.
